PolicyAI — Final Submission Draft

Quantic AI Engineering Project | Synthetic policy RAG assistant

Overview

Flask API and web interface, ChromaDB cosine-similarity retrieval, sentence-transformers embeddings, and Groq LLM answer generation with source IDs.

Corpus

10 fictional Markdown policies; 11,591 words; 32 pages in the A4 export. See CORPUS_10_POLICIES.pdf.

Evidence and evaluation

A historical 25-question baseline is preserved. Fresh evaluation after corpus expansion is required before reporting current answer quality and latency.

Repository URL

TO BE FILLED IN AFTER GITHUB PUSH

Demo URL

TO BE FILLED IN AFTER VIDEO UPLOAD

CI and grader access

TO BE VERIFIED: GitHub Actions passing; quantic-grader invited.

Limitations

Heuristic retrieval threshold, external LLM rate limits, and potential unsupported answers. Synthetic data only; not a production compliance system.
